

5-21 Rostov '41 (13 Oct 20)

1) Ignore the sentence:

“For Rostov, Bataysk and Novochoerkassk, the second, higher point value is awarded if the Germans control the feature at the game’s end” at the end of 2.1 just before the Victory levels.

Use the description explained in the sentence right below the VP City values list which gives the end of game values in the right order (first where two are listed).

2) A couple of typos on the rulebook back cover: Hills in Mud is missing a parenthesis. “Artiller;” should be “Artillery.”

3) The Soviet 2-step units are identified with a yellow dot in the upper left of their counters. They are relatively few and hard to spot in the sea of brown units. The Axis units are all 2-step except those that are Artillery or of Battalion size. They are not so marked as they are not hard to spot.
